Information according to Article 33 on the REACH candidate substance 4,4'-sulfonyldiphenol (bisphenol S)

Dear Ladies and Gentlemen

Against the background of high product safety and supply assurance we would like to meet our information obligation according to Article 33 of the REACH regulation for substances of very high concern (SVHC).

Our *thermoscript*[®] thermal paper coatings **46 / 56** contain more than 0.1 % (w/w) of the following substance which is on the Candidate List dated 17/01/2023 pursuant to Article 59 (1, 10) of Regulation (EC) 1907/2006 („REACH“):

| <u>Candidate substance</u> | <u>CAS-No.</u> | <u>EC-No.</u> |
|--------------------------------------|----------------|---------------|
| 4,4'-sulphonyldiphenol (bisphenol S) | 80-09-1 | 201-250-5 |

(also see the ECHA website <https://echa.europa.eu/candidate-list-table>)

The presence of the candidate substance has currently no direct legal impact, neither on production nor on placing on the market of the aforementioned product(s). However, being part of the supply chain, you are obliged to provide the respective information to your customers, according to Article 33 of the REACH Regulation.

Yours sincerely,

Nic Holmer
Director Sales & Marketing
Mitsubishi HiTec Paper Europe GmbH
